### Portfolio Strategy

BMO Equal Weight Utilities Index ETF has been designed to replicate, to the extent possible, the performance of the Dow Jones Canada Select Equal Weight Utilities Index, net of expenses. The Fund invests in and holds the Constituent Securities of the Index in the same proportion as they are reflected in the Index.

### Benchmark Info

The Solactive Equal Weight Canada Utilities Index consists of the securities that are classified as utilities. In addition, each security in this Index is allocated a fixed weight rather than a market capitalization weight. The Solactive Equal Weight Canada Utilities Index is rebalanced semi-annually in March and September. To be included as a Constituent Security, an issue must meet certain minimum trading volume requirements and be incorporated in, or has its primary market listing in Canada.

### Fund Benefits

- Designed for investors looking for growth solutions

<sup>2</sup> Beta is a measure of how a BMO ETF responds to moves in the broader market in which it invests. A beta of greater than 1.00 suggests that the ETF is more volatile than the market, while a beta of less than 1.00 suggests that the ETF is less volatile than the market. Beta may change over time and historical beta is not indicative of future beta. The indicated beta is generally based on historical rolling two-year returns. Where a BMO ETF does not have two years of performance history, the beta may be calculated as long as at least six months of performance history is available.
