## iShares Canadian Fundamental Index ETF

As of 09/30/2017

iShares®  
by BLACKROCK®

iShares Canadian Fundamental Index Fund seeks to track, less fees and expenses, the FTSE RAFI Canada Index which comprises those Canadian companies with the highest fundamental weightings. They're selected on the basis of 3 factors aggregated over 5 years: total cash dividends, free cash flow and total sales. Current book equity value is also taken into account.

## WHY CRQ?

- 1 Tracks an index that selects companies based on fundamental factors including dividends, free cash flow, sales and book value
- 2 Methodology seeks to avoid overweighting overvalued stocks and underweighting undervalued stocks
- 3 Diversified exposure to a fundamentally weighted portfolio of Canadian stocks

iShares® Funds are managed by BlackRock Asset Management Canada Limited ("BlackRock Canada"). Commissions, trailing commissions, management fees and expenses all may be associated with investing in iShares Funds. Please read the relevant prospectus before investing. The indicated rates of return are the historical annual compounded total returns including changes in unit value and reinvestment of all distributions and do not take into account sales, redemption, distribution or operational charges or income taxes payable by any securityholder that would have reduced returns. The funds are not guaranteed, their values change frequently and past performance may not be repeated. Tax, investment and all other decisions should be made, as appropriate, only with guidance from a qualified professional.

The above results are hypothetical and are intended for illustrative purposes only. The Hypothetical Growth of \$10,000 chart reflects a hypothetical \$10,000 investment and assumes reinvestment of dividends and capital gains. Fund expenses, including management fees and other expenses, were deducted.

Unlike an actual performance record, hypothetical results do not represent actual performance and are generally prepared with the benefit of hindsight. In addition, hypothetical trading does not involve financial risk. There are frequently differences, including material differences, between hypothetical performance results and the actual results subsequently achieved by any particular fund. Since trades have not actually been executed, hypothetical results cannot account for the impact of certain market risks such as lack of liquidity. There are numerous other factors related to the markets in general or the implementation of any specific investment strategy, which cannot be fully accounted for in the preparation of hypothetical results and all of which can adversely affect actual results.
