Why invest?

Enhanced yield: PDC invests in liquid, high-yielding securities of Canadian corporations with a track record of growing dividends. By screening for dividend yield, the Underlying Index achieves a higher yield than the broad market.

Tax-preferred income: Canadian-eligible dividends receive preferential tax treatment relative to interest income, which can result in a higher pre-tax interest-equivalent yield.

Growth and income: PDC provides a diversified source of dividend income, relative to investing in a single dividend-paying security, and growth potential from stock price increases and the compounding effect of reinvested dividends. Historically, dividends paid by companies have accounted for a significant portion of the total return provided by equities over the long term.
